OBJECTIVE

As a Full-Stack Developer specializing in React.js, Redux Toolkit, Tailwind CSS, and Django REST Framework, my goal is to build scalable, secure, and user-friendly web applications. I enjoy crafting modern, responsive frontends with clean UI and managing complex state efficiently, while also developing robust backend APIs that ensure smooth communication between systems. I am passionate about turning ideas into functional digital products that deliver both great performance and excellent user experiences.

PROJECTS

Visitor Pass Management - Timechat

---<https://timechat.theprocess.in/>

Role : Full-Stack Developer

Tech Stack : React.js, Django REST Framework , PostgreSQL.

- Developed a role-based visitor management system with admin and receptionist modules.
- Implemented secure API endpoints for check-in/check-out tracking and notifications.
- Designed a responsive frontend using React and TailwindCSS.

Gold Bullion

---<http://www.shivamtraders.online/>

Role : Full Stack Developer

Tech Stack : React.js , Tailwind Css with custom Ccasses , Redux Toolkit (RTK Query) with custom hooks

- Worked as a Full Stack Developer using Django REST API to fetch live Gold, Silver, and INR rates, and built the frontend using React Js.
- Integrated role-based access and authentication for secure dashboard usage.

Foot Court Application & The Process

Role : Backend Developer

Tech Stack : Django REST Framework, Postgres.

- Django REST Framework, ensuring secure and efficient API design.
- Implemented CRUD operations, authentication, and role-based access control for users and vendors.
- **The Process** - Entire Backend API wrote in Django Rest Framework using **Postgres** database.

Prime Store Supplier Application

---<http://marketplace.thescmsilk.com>

Role : Full Stack Developer

Tech Stack : React.js , Tailwind Css, Django Rest Framework, Oracle.

- Worked as a Full Stack Developer using Django REST API to store the supplier details.
- Designed a responsive screen for all device using a Tailwind CSS.
- Using Oracle database to store the details.

PROFESSIONAL EXPERIENCE

Junior Associate

January 2025 – Present | AV7SCM , TIRUPPUR

Technologies : React.js , Redux Toolkit(RTK Query, Async Thunk) , Django REST Framework , PostgreSQL.

- Developed and maintained interactive web applications using **React Js** and **Redux Toolkit**, leveraging both **RTK Query** and **Async Thunk** for efficient backend communication.
- Integrated and managed **RESTful APIs** built with **Django REST Framework** for secure data exchange and **CRUD** operations.
- Implemented state management, caching, and **real-time** updates using **RTK Query** to optimize frontend performance.
- Collaborated with backend developers to design scalable API endpoints and improve data flow consistency.
- Built responsive **UI components** with **reusable** and modular React patterns, ensuring high performance and maintainability.
- Worked with **PostgreSQL** for structured data management and optimized database queries for performance.

EDUCATION

B.Tech(Information Technology), Nandha College of Technology, Erode. (2019 - 2023) **CGPA:** 8.22 .
Sree Ramakrishna Vidhyalaya Matric Higher Secondary School, Tiruppur. (2019) **HSE:** 66.3%

SKILLS

Frontend :

-- **Core Web Technologies :** HTML, Javascript(ES6+) , CSS , React.JS, Tailwind CSS .

--**State & API Management :** Redux / RTK Query, Axios, Fetch Api , React Router.

Backend :

--- Django , Django REST Framework(DRF)

--- API Development & Integration.

--- Authentication(JWT,Session)

DataBase :

PostgreSQL , MySQL

Tools & Platforms :

Git & GitHub , GitLab , VS Code , Postman.

Others :

Postman.

REST API Design, JSON, Responsive Design .

STRENGTH

- Quick learner of new technologies
- Focused on writing clean, modular code
- Effective collaboration and problem-solving.
