MY PORTFOLIO

<https://portfolio-naveennk.netlify.app>

TECHNICAL SKILLS

FRONTEND

- React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- Redux / RTK Query.
- Axios, Fetch API, React Router

BACKEND

- Python, Django, Django REST Framework (DRF)
- API development & integration
- Authentication (JWT, Session)

DATABASE

- PostgreSQL, MySQL,

TOOLS & PLATFORMS

- Git & GitHub, VS Code, Postman,

OTHERS

- REST API Design, JSON, Responsive Design, Cross-Browser Compatibility

EDUCATION

Bachelor of Information Technology

Nandha college of technology

CGPA - 8.22

2019 -2023

HSC (Higher Secondary Course)

Sree Ramakrishnaa Vidhayalaya

Matric Higher Secondary School

Percentage - 66.3 %

2018 - 2019

STRENGTHS

- Quick learner of new technologies
- Focused on writing clean, modular code
- Effective collaboration and problem-solving

OBJECTIVE

As a Full-Stack Developer specializing in React.js, Redux Toolkit, Tailwind CSS, and Django REST Framework, my goal is to build scalable, secure, and user-friendly web applications. I enjoy crafting modern, responsive frontends with clean UI and managing complex state efficiently, while also developing robust backend APIs that ensure smooth communication between systems. I am passionate about turning ideas into functional digital products that deliver both great performance and excellent user experiences.

PROJECTS

Visitor Pass Management System

Role: Full-Stack Developer

Tech Stack: React.js, Django REST Framework, PostgreSQL

- Developed a role-based visitor management system with admin and receptionist modules.
- Implemented secure API endpoints for check-in/check-out tracking and notifications.
- Designed a responsive frontend using React and Tailwind CSS.

Food Court Application

Role: Backend Developer

Tech Stack: Django REST Framework, PostgreSQL

- Developed and managed the entire backend using Django REST Framework, ensuring secure and efficient API design.
- Implemented CRUD operations, authentication, and role-based access control for users and vendors.

PROFESSIONAL EXPERIENCE

Nov 2024 – Present

Technologies: React.js, Redux Toolkit (RTK Query, Async Thunk), Django REST Framework, PostgreSQL

- Developed and maintained interactive web applications using **React.js** and **Redux Toolkit**, leveraging both **RTK Query** and **Async Thunk** for efficient backend communication.
- Integrated and managed **RESTful APIs** built with **Django REST Framework** for secure data exchange and CRUD operations.
- Implemented **state management, caching, and real-time updates** using **RTK Query** to optimize frontend performance.
- Collaborated with backend developers to design scalable **API endpoints** and improve data flow consistency.
- Built responsive UI components with reusable and modular React patterns, ensuring high performance and maintainability.
- Worked with **PostgreSQL** for structured data management and optimized database queries for performance.
